

QUICK SHINGLE

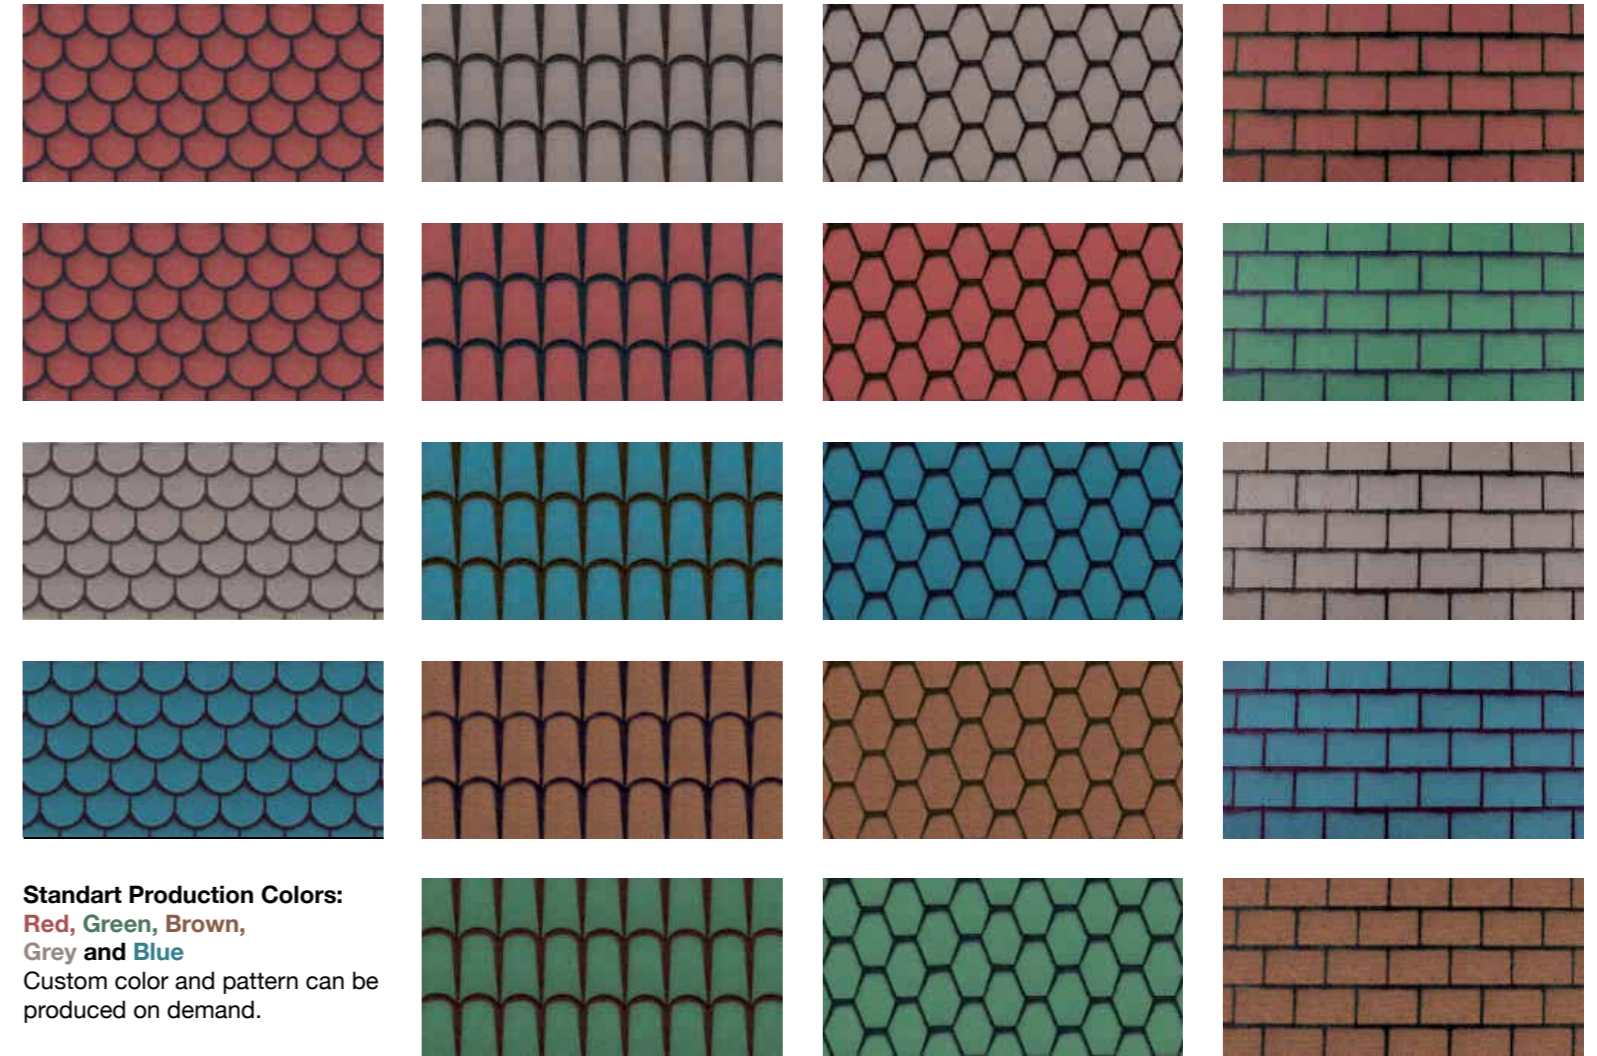

Quick Shingle was created to be used in place of any kind of roofing material. It is a granule stone coated bituminous membrane roofing material with surface of painting or formed theme, pattern (tile image, etc.) figure, image, logo and / or print. Quick shingle has been produced as an alternative roofing material for terrace and sloping roofs.

ADVANTAGES

1. Economic price and low labor cost
2. Easy application, even by end user
3. Monolithic pattern and its self adhesive features prevents tearing caused by wind
4. Strong and reliable
5. Monolithic pattern prevents dust and dirt because of its flat surface in contrast to leaf type shingles.
6. Adds value to buildings with changing the view of the building.

Standart Production Colors:
Red, Green, Brown,
Grey and Blue
 Custom color and pattern can be produced on demand.

WHY SHOULD I USE QUICKSHINGLE?

Low labor cost.

A workman lays 30-50m2 shingles, 20-30m2 tiles but 80-100m2 quick shingle in one shift. Low wastage and light weight compared to other types. It can be applied by end users because of its easy application.

Weight

3 times lighter than its competitors.

Nonfading

Stays colored for long years thanks to its UV protecting pigments.

Leak proof

Full leak proofing and insulation because of Shalumo Torch application and no nails.

Four season

It can be applied at any sloping roof and in any season.
